4.0 ABBREVIATION AND DEFINITIONS

Nil

5.0 PROCEDURES

- Organization has defined four stages of inspection named as stage 1, QC for incoming materials, stage 2, IPQC for in-process materials, stage 3 for Finished Goods inspection and stage 4 for post packing and pre-dispatch inspection.
- The Quality Control Department carries out the required inspection at various stages in accordance with the QAULITY PLANS.

Incoming material inspection

- The QC personnel receive the intimation for sampling and testing from the store in-charge along with supplier COA, if available.
- For incoming material, QC personnel enter the details in the incoming material Analytical Reference Book (**LGB/QDG/CL/010/001**-Infusion raw material, **LGB/QDG/CL/010/002**-Syrup raw material, **LGB/QC/010/CL/003-Infusion Packaging material** and **LGB/QC/010/CL/004-Syrup Packaging material)** for both infusion and syrup plants respectively) and assign QC A.R number to the received materials. The QC Analytical Reference Number shall be as given below;
  RMF/AR/QC/YY/XXXXX OR RMS/AR/QC/YY/XXXXXX (Raw Materials).
  Where;
  RMF: Raw Material Infusion
  RMS: Raw Material Syrup
  AR: Analytical reference number
  YY: Last two digits for that Year
  QC: Quality Control
  XXXXX: Serial Number and Material reference acronyms. See guide **BML-QDG-CL-010-G01**) for details.

CONTROL COPY

PMS/AR/QC/YY/Material dedicated letter, serial number, volume or identification letter for the product (Infusion) OR PMS/AR/QC/YY/Material dedicated letter, serial number, volume or identification letter for the product (Syrup). See guide **BML/QDG/CL/010/G03** for details.

Where:

- PMF: Packaging Material Infusion
- PMS: Packaging Material Syrup
- AR: Analytical reference number
- YY: Last two digits for that Year
- QC: Quality Control

- QC personnel shall take samples and conduct testing as per the standard requirement
- If the material meets all pre-defined specifications, then it shall be released for further action.

In-process Inspection

- During the in-process inspection, it is to ensured that line clearance must be performed as pre-defined procedure
- If there is any discrepancy in the output or the process, corrective actions must be implemented according to standard procedure and documented.

Finished Good Inspection

- For finished goods, QC personnel enter the details in the Finished goods Record Book (LGB/QDF/CL/019/001-Infusion, LGB/QDS/CL/019/001-Syrup) and assign QC Analytical Reference number to the finished goods. The QC report number shall be as given below;
  BML/QA/FG/YY/Product code and BMR issuance serial number.
  Where:
  - BML: Biomedical Limited
  - QA: Quality Assurance
  - FG: Finished Good
  - YY: Last two digits for the Year
  - Product code:
- QC personnel shall take samples and conduct as per the standard testing procedure.
- If the product meets all pre-determined specifications, then it shall be released for further action.
