1.0 OBJECTIVE:

To provide the method for arrangement of pouches in the batch coding room.

2.0 SCOPE:

- To provide written guidelines for arrangement of coded and codeless pouches in the batch coding Room.

3.0 RESPONSIBILITIES/ACCOUNTABILITIES:

Batch coding supervisor, Production Pharmacist, Q.A Officer, Production Supervisors, Foremen and Operators.

4.0 ABBREVIATION AND DEFINITIONS

- Q.A. - Quality Assurance.

5.0 PROCEDURES

- Ensure that the production plan for the day is confirmed from the production pharmacist so as to be informed the pouches to request and the quantity.
- Requisition is made from the warehouse using the requisition booklet and signed by appropriate personnel.
- Ensure that protective clothing and gloves are worn.
- The pouches are passed through the pass box into the batch coding room from the side outside the coding room while the other end inside the coding room is closed.
- After filling the pass box with the pouches, the pass box is closed.
- The pass box is then opened from inside the coding room to carry the pouches.
- The pouches while wrapped in a protective nylon are placed carefully on the stainless steel floor pallet without touching the floor.
- Ensure that the distance of the pouches trays are at least 50cm (0.5m) from the air vent located at the lower third of the wall.
- Detach the pouches one after the other and give to the coding machine operators to code.

Coded Pouches

- The pouches are removed from the coding machine arranged in group of 5 to 10 pouches.
- In the designated area for coded pouches, arrange the pouches in clean water proof nylon.

BIOMEDICAL LTD

- Place it on the stainless steel pallet and should be at least 50cm from the wall return vent located at the lower end of the wall.
- Call the appropriate personnel for line clearance before coding the next batch.

Materials, Equipment

Stainless Steel Pouch Pallets
