5.0 PROCEDURES

Precaution:

- Switch "***OFF***" the UV Light before entering.
- Always wear sterilized overalls before entering.
- Ensure that the room is properly cleaned.
- Ensure that sterile non-powder latex hand gloves are used.
- Ensure that solution lines and filling machines have been steamed and there is no trace of previous batch confirmed by In -Process Q.A analyst.
- Ensure that the coded bags are available and passed into filling room through Batch Coding pass box.
- Double check the coded bags before filling to avoid filling errors.

OPERATION:

- For both the membrane and pre-filter proper, the Operator should wear another pair of gloves.
- Flush the solution line again with 75L of WFI.
- Request solution preparation Unit Staff to shut water valve and open solution valve.
- Flush the Solution line with 15L of solution to be filled.
- Open the nozzle to fill the empty pouches.
- QC analyst confirms volume checks.
- Attach identification tag to the first two filled pouches for QC test.
- Drop pouches on trays provided and send to loading bay through the pass box.

BIOMEDICAL LTD

- On completion of each batch, record both filled/unfilled pouches.
- Return the unfilled pouches to batch coding room.
- Do the line clearance.
- Document the process in appropriate record.

MATERIALS, EQUIPMENT

- Semi-automatic filling machine.
- S/S pipes.
- WFI- Water for Injection.
