5.0 PROCEDURE:

CLEANING THE AREA

- De-dust all the Engineering areas including the Corridors, Boiler Room, generator house, water treatment area etc. with clean broom.
- Remove the cobwebs with the help of the long broom.
- Clean the windows with clean hand towel & soft mop.
- Use Soap solution and mop the area with it using clean mop-brush. Frequently wash the mop with clean water to remove the dirt collected in it.
- Take extra effort to clean the joints between wall & floor as it is likely to accumulate more dirt.

SANITIZATION OF THE AREA

- Prepare the disinfectant solution as per the preparation of disinfectant solution SOP **BML-QDG-QA-019.**
- With the help of the spray pump spray the disinfectant solution on the whole floor.
- Leave it like this for at least 10 minutes. Mop away the excess disinfectant solution from the floor after 10 minutes to render the floor dry.

FREQUENCY OF CLEANING

- The Boiler Room, Water Treatment Area, Generator house, Engineering office & Engineering Workshop is to be cleaned once a day. Immediately after cleaning, daily cleaning chart with Document number BML-ENG-NG-001-F01 for each area must be signed off and checked by the supervisor on shift.

MAINTAINING THE CLEANLINESS OF AREA

- Ensure there is no accumulation of oil or grease on the floor.
- Be prompt to clean any oil spillage.
- Irrespective of the schedule, any oil spills or dirt noticed around the engineering workshop must be cleaned immediately.
