BIOMEDICAL LIMITED

DETERMINING THE NEED FOR CHANGE CONTROL

BML-QDG-QA-071-F01

MASTER COPY

Description of Change:

S/N	PROCESSES/COMPONENTS	YES	NO
1.	Changes to procedures or process [including laboratory methods]		
2.	Changes to equipment [including laboratory equipment]		
3.	Changes to utilities		
4.	Changes to maintenance and calibration routines		
5.	Changes to products including formulation change		
6.	Changes to materials		
7.	Changes to premises		
8.	Changes to information on Computer software		
9.	Changes to facility design and plans		
10.	All engineering changes involving modifications or use of substitute or redesigned parts		
11.	Replacement involving identical or equivalent parts not covered by a quality approved control system [e.g. maintenance plan]		
12.	Project activities impacting on existing facilities		
13.	Artwork changes		
14.	Can directly affect the product quality by normal operation or control [e.g. impurity profile, crystal form and size, residual solvent or stability]		
15.	Indicates and records alarm functions critical to the process		
16.	Is used to demonstrate compliance with the registered process/ Regulatory Impact		
17.	Is used to perform analytical investigations that are relevant for batch release		
18.	Is used for critical calculations [e.g. analytical data that are relevant for batch release]		
19.	Is used for batch release		
20.	Is used to give information about the quality of the product [e.g. printers for process related data]		
21.	Is used to ensure or record critical conditions for warehouses		
22.	Is used to control maintenance or calibration of critical equipment		
23.	Changes to the Quality Manual		
24.	Changes to the Water Quality Manual		
25.	Changes to the Validation Master Plan		
26.	Changes to the Site Master File		
27.	Changes to Shelf Life		
28.	Change to manufacturing process		
29.	Change to cleaning process		
30.	Change to analytical method		
31.	Change to analytical specification		
32.	Change to ingredient addition steps
