1.0 OBJECTIVE:

To provide the method for identification of non-sterile and sterile products on the production floor.

2.0 SCOPE:

To provide written guidelines for identification of non-sterile and sterile products on the production floor.

3.0 RESPONSIBILITIES/ACCOUNTABILITIES:

Autoclave operators, loading and offloading personnel, Production Pharmacist and Q.A Officer.

4.0 ABBREVIATION AND DEFINITIONS

- Q.A.- Quality Assurance

5.0 PROCEDURES

Unsterilized Batch

- The unsterilized batch received from the filling room through the pass box is arranged on the trolley following the standard procedure of arrangement.
- After careful arrangement, the appropriate 'Unsterilized' tag is placed on it.
- This is then transferred to the autoclave area by the loading personnel.

Sterilized Batch

- Just before the batch is transferred into the autoclave by the autoclave operators, the 'Unsterilized' tag placed on it is removed.
- As soon as the sterilized batch is removed from the autoclave, a 'sterilized' tag is placed on it by the autoclave operators.

BIOMEDICAL LTD

- The 'unsterilized' tag is returned to the loading area.
- The off loaders are required to discharge the sterilized batch one pouch at a time on the pallet.
- After all the products are discharged, the 'sterilized' tag is placed on it.
- This will remain on it till it is ready to be packaged.
- Once the process of packaging starts, the 'sterilized' tags are retrieved.

Materials, Equipment

- Tags (Sterilized and Unsterilized).

6.0 REFERENCE AND ENCLOSURE

In-House
