N/A

5.0 PROCEDURES

1. Ensure that mixing tank is empty, and all the solution of the previous product is filled.
2. Remove the bolt of the filter Clamp then remove the mesh and the filter paper.
3. Then immerse the mesh in hot water and shake well to any particle that may adhere on the surface.
4. Also, clean other parts of the clamp.
5. Then fix it again with new filters.
6. Clean the filling nozzles surface with IPA solution.
7. Pass the hot distilled water through the filtration unit and filling unit for 1 minute, to ensure that the entire filtration and filling line tubes are cleaned thoroughly.

Ensure Proper Line clearance is taken for all equipment before starting of the Next product.
