1.0 OBJECTIVE:

To provide written guidelines for cleaning and sanitization of Filtration unit and Filling Machine.

2.0 SCOPE:

This SOP covers the procedure for cleaning and sanitization of Filtration and Filling Machine.

3.0 RESPONSIBILITIES/ACCOUNTABILITIES:

Filling Operators, Production Pharmacists, Quality Assurance Officer.

4.0 ABBREVIATION AND DEFINITIONS

WFI- Water for Injection.

5.0 PROCEDURES

FREQUENCY: Once in a week during weekly maintenance shut down.

- Wear the appropriate PPE as stated in the SOP.
- Pour 2g of citric acid into 5L WFI water collected in a clean bowl.
- Dismantle the filtration unit and remove the membrane filter.
- Drop all the loosen parts of the filtration units into the citric acid solution including the 8 bolts.
- Allow it to stay in the solution for 5 hours.
- Drain the water and add fresh WFI water.
- After this, remove the water and add fresh hot water for injection to rinse thoroughly.
- Re-fix the dismantled filtration units without membrane filters.
- Wipe the outer surface of filling nozzles with clean napkin.
- Pass hot WFI from the mixing tank through the filtration units, tubes and filling nozzles for 10 minutes.
- Call the Q.C personnel to take water sample from the nozzles for analysis.
