1.0 OBJECTIVE:

To provide the method for clearance of production lines between mixing room and filling room.

2.0 SCOPE:

To provide the method for clearance of production lines between mixing room and filling room.

3.0 RESPONSIBILITIES/ACCOUNTABILITIES:

Production Pharmacist, Production Supervisor, Quality Assurance Officer.

4.0 ABBREVIATION AND DEFINITIONS

WFI- Water for injection.

5.0 PROCEDURES

GENERAL

Line clearance is done immediately after finishing production of a batch.

Procedure:

- Ensure that the mixing vessel is empty and close the valves.
- Allow hot WFI to flow from water treatment plant and rinse the mixing tank thoroughly for about five minutes using the pipe provided.
- Drain off the water from the mixing tank by opening the valve underneath the tank.
- Repeat the steps above again.
- Then transfer about 75L hot WFI into the already cleaned tank above.
- Send the 75Litres hot WFI water through the stainless steel pipe line into the filling room.
- Allow it to flow through all the nozzles of the filling machines.
- After this, send 15L of the solution to be filled from mixing room through the stainless steel pipe to the filling room.
- Allow it to flow through the nozzles of the filling machines.

BIOMEDICAL LTD

- Allow the Q.A. Personnel to confirm that there are no traces of previous batch before starting another batch.
