MASTER COPY

	Biomedical Limited, No 1 Ohimege Road, Industrial Estate, Ilorin Kwara State, PMB 1449	
	Internal Audit checklists	
	Self Inspection Checklists (Quality)	**BML-QDG-QA-053-F03C**

Date of audit: ……. Time started: ……. Time ended: …….

Name of the lead auditor …… Designation ……

S/No.	***Check Points for Quality Control***	***Decision***	***Answer***
General QC			
1	Are objective and principles of cGMP understood and applied?	Yes / No	
2	Does each section have relevant standard operating procedures [SOPs]?	Yes / No	
3	Are the testing methods available and validated?	Yes / No	
4	Are training conducted as per training programme? Check the record available and update	Yes / No	
5	Is every person aware of company's quality policy	Yes / No	
6	Has the quality control laboratory got adequate equipment for the performance of QC functions	Yes / No	
7	Is the temperature gauges record available and recorded?	Yes / No	
8	Is there different record for raw water analysis DM, RO and WFI record?	Yes / No	
9	Are the calibrated standard weights available?	Yes / No	
10	Is record for equipment cleaning available?	Yes / No	
11	Are products released for sale/distribution only after certification by the authorized person?	Yes / No	
12	Are control samples of finished products retained for a period of at least one year after the date of expiry?	Yes / No	
13	Are all the reagents, chemicals and culture media recorded on the receipt?	Yes / No	
14	Are reference standards are kept under the responsibility of a designated person in a secure area?	Yes / No	
15	Is lab well equipped to carry out all the required tests?	Yes / No	
16	Are the Chemical & Media consumption records maintained	Yes / No	
17	Are tests for disinfectant effectiveness studied and established at different concentrations?	Yes / No	
18	Is external calibration/ validation of all lab equipment done as at when due?	Yes / No	
19.	Are destruction records of control sample updated?	Yes / No	
20.	Are there logbooks updated and signed?	Yes / No	
Documentation			
1	Check that company is having the approved SOP bunch.	OK/Not OK	
2	Check that all SOP in the bunch are watermarked with “Biomedical”	OK/Not OK	
3	Review the BMR for online process and check that up	OK/Not OK	

CONTROL COPY

	to process BMR is filled?		
4.	Are all quality documents updated as at when due?	Yes / No	
5.	Check the Apex documents for update	OK/Not OK	
6.	Are the training file updated?	Yes / No	
7	Does the Filling system allow easy retrieval of document	OK/Not OK	
8	Good Housekeeping in the dept	OK/Not OK	
9	Destruction records	OK/Not OK	
10	Are Documents current, updated and well kept?	OK/Not OK	
11	Are all procedures being followed?	OK/Not OK	
12	Are SOPs current and being followed?	OK/Not OK	
13	Is the issuance and retrieval of documents documented?	OK/Not OK	
Cleaning and General housekeeping			
1	Is cleaning done regularly in the lab?	Yes / No	
2	Is pest control maintained in the laboratory?	Yes / No	
3	Is glassware cleaned properly?	Yes / No	
4	Are working benches and records cabinets checked for the cleanliness regularly?	Yes / No	
5	Are records properly arranged in the shelves?	Yes / No	
Raw material testing			
1.	Are specifications and method of analyses for all raw materials available?	Yes / No	
2.	Are they written and approved by two responsible officials?	Yes / No	
3.	Is raw material analysis register/note book maintained? Check records of any two raw materials.	Yes / No	
4.	Are raw material records checked by Q.C. Officer / manager?	YES/NO	
5.	Check the traceability of Raw materials & records.	Ok/Not Ok	
6	Are records related to preparation & Standardization of working standard available and maintained?	Yes / No	
7.	Check working standards for following- - Label -Storage -manufactured date /expiry date	Ok/Not Ok	
8.	Are primary standards of Raw materials -Checked -Identified	Yes/No	
9	Is sample sticker pasted on a container from which sample is taken?	Yes/No	
10	Are sample bottles labeled properly?	Yes/No	
11	Is 'under test' label on all container, from which sample	Yes/No	

	are taken.		
In-process & finished product testing			
1	Check reference standards : -Lot No -Storage condition -usage instruction	Ok/Not Ok	
2	Are specification & test methods available for all in-process & finished product.	Yes/No	
3	Check and verify that specifications and test procedures are in compliance with those registered with Regulatory Agencies.	Yes/No	
4	Are test protocols/Analysts note book checked for a)Correctness, as per specifications b) Signatures	Yes/No	
5	Are analytical method Validated?	Yes/No	
6	Are in-house calibration records of following Q.C. instruments available: UV SPECTROPHOTOMETER, METTLER BALANCE etc.	Yes/No	
7	Are Q.C. instrument labeled accordingly?	Yes/No	
8	Check the Calibration tag for a) Instrument names and tags no. b) Calibrated on c) Next calibration due on d) Calibrated by (Initial)	Yes/No	
9	Are the laboratory reagent and other chemicals supplied, identified, tested and retest/expiration dated?	Yes/No	
10	Are there procedures for the preparation, standardization storage and usage of working standard / reference method?	Yes/No	
Microbiology lab (Syrup and Infusion)			
1.	Are GLPs adhered to	Yes/No	
2.	Are all related SOPs available for each area	Yes/No	
3.	Is entry procedure to inoculation area defined and followed.	Yes/No	
4.	Is environmental monitoring procedure available and Are records kept for environmental monitoring?	Yes/No	
5	Are the methods used in micro lab validated?	Yes/No	
6	Check that water testing reports are complete and updated?	Ok/Not Ok	
7	Check that area temp and monitoring record of incubators are maintained?	Yes/No	
8	Is validation record of Autoclave available?	Yes/No	
9	Are sterility testing records available?	Yes/No	
10	Are control standard endotoxin No., LAL reagent water No., Lysate No. of bacterial endotoxin test kit reflected	Yes/No	

	in the respective analysis records?		
11.	Is the disposal of media carried out as per the SOP?	Yes/No	
12	Are analytical methods current and being followed?	Yes/No	
13	Are registers, logbooks Reagent labels and Analyst notebooks available, current and well kept?	Yes/No	
14	Are calibration and validation done as required and are records available?	Yes/No	
15	Analysis – 14 days release being followed (check records)	Yes/No	
16	Work benches/reagent cabinets /lockers and work environment.	Yes/No	
17	Media Storage conditons	Yes/No	
18	Is there a written environmental monitoring program?	Yes/No	
19	How are environmental monitoring standards set?	Yes/No	
20	Is environmental monitoring of the lab conducted?	Yes/No	
21	Has the microbial profile for the lab been developed?	Yes/No	
22	Is the laboratory properly cleaned and disinfected regularly according to SOP?	Yes/No	
23	Are disinfectants rotated?	Yes/No	
24	Are autoclaves validated?	Yes/No	
25	Are periodic re-validations conducted?	Yes/No	
26	Have microbial profiles of the manufacturing environments been developed?	Yes/No	
27	Is the microbial monitoring of the stability chambers done and recorded?	Yes/No	
28	Gowning procedure.	Yes/No	
29	Validation of sanitizing agents and record.	Yes/No	
30	Availability and effectiveness of Lamina flow.	Yes/No	
31	Maintenance records available	Yes/No	
Stability lab			
1	Stability study conducted as per current guidelines?	Yes/No	
2.	Check the Temperature & humidity record of stability room.	Ok/Not Ok	

3.	Are studies conducted as per the schedule?	Yes/No	
4.	Are stability records maintained for the products kept for the stability studies and results are satisfactory?	Yes/No	
Training			
1	Is there a training schedule?	Yes / No	
2	Are training programs carried out as scheduled?	Yes / No	
3	Are training needs of personnel identified?	Yes / No	
4	Are Training records of personnel properly kept?	Yes / No
